Assignment 2 Final

The third and current President of XI-Tech, which is the first and only human space colony, is Vasiliy Matthews Ivanov. He is a descendant of the last President of a country once called the United States of America who was half American and half Russian. Vasiliy stands around 180cm tall and weighs 68kg. He is a lean and handsome young man of age 24 and also the youngest XI-Tech board member. Vasiliy, whose nickname is Visya, has wavy ash blond hair which flows a few inches past his shoulders, almond-shaped teal eyes, and almost bleached pale skin due to the lack of sun exposure.

As the most powerful man on the colony, Visya has to live up to many high expectations. He never fails to deliver and he is very meticulous about his appearance. Visya is the kind of man that appreciates attention to details. He is always seen in his crisp suit, complete with merit badges, his family crest, a distinctive hair ornament, an automatic calibre watch that is specially made for him, and a shiny pair of shoes.

Visya is a narcissistic man and he is as vain as he is brilliant. He is the creator of the PicoBots, a technology that can suppress aging and build artificial cells. Visya always sports a sardonic grin and does almost everything with flamboyance. Despite his autocratic and arrogant personality, many people respect Visya and some go as far as worship him.

Visya had an elder brother, who like he, was also an adroit person. The brother, Yuriy, was not as fortunate as Visya for he was crippled from the waist down. Nothing could be done to remedy his ailment despite the advanced technology. Yuriy was the second President of XI-Tech but died at the young age of 27 due to unknown circumstances and left the seat open to his younger sibling, Visya, who was then just

19. Some say that the PicoBots are created in the memory of Yuriy. Visya's tendency to shut himself from others is probably due to the death of his beloved brother who was the only remaining family he had. This does not mean that Visya is an introvert man as he is quite the opposite. He enjoys the attentions he receives be it good or otherwise.

Visya, like most others in the colony, is an atheist and rejects all religions but ironically, he believes that he is a higher being and is responsible to bring humanity to the next level of existence.
